Homes for all

Trade unions are fighting -

- **for more houses to be built by local councils;**
- **to abolish the cap on Housing benefit;**
- **for the definition of “affordable” to be based on average wages not market rates;**
- **for rent controls that relate to earnings, not scarcity of housing;**
- **for secure tenancies in all sectors**
- **to stop unfair evictions;**
- **to end the “Right to Buy” in council and social housing;**
- **for local council powers to take control of, or compulsory purchase unoccupied properties or land**
